"I was talking with a few doctors who came out to the east clinic and they wanted me to tell you how pleased they are with your work. They feel this building has surpassed their expectations, and feel that you have done a great job. I told them you all have been great to work with from my perspective as well. Thanks again, we appreciate the building and how communicative and easy to work with you all have been in the process"

- Lance Haller, The Women's Health Group Administrator

## Your vision matters.

Since its inception, BG Consultants, Inc. has maintained a staff of in-house architects and structural engineers to serve its clients. We provide architectural, engineering, interior design, programming, and planning services for communities throughout Kansas. Our multi-disciplinary background and training allows us to design complete solutions for diverse project types.

Our clients are an integral part of the design team. We pursue a high level of quality in our design process and utilize problem-solving strategies to make the project better. We maintain continuous communication to develop a building that reflects the clients' requirements.

Pursuit of a high level of quality drives our design process and influences our problem-solving strategies. As design professionals, we appreciate the effect of the built environment on a cultural and individual level and respect the context of every project. This sustains our commitment to quality in design and the resolution of our clients' needs. We are committed to designing a final project that is functional, aesthetically pleasing, respectful of the environment, and responsive to the clients' financial capabilities.

### ABOUT US

As a regional mid-sized firm, we have in-house professionals who serve as technical experts in their fields. We work hard to understand the needs of our clients, from the specific demands of their facilities to the requirements of fulfilling public needs and oversight.

We design with consideration to the regional context, are knowledgeable about local trade conditions and regulations, and use creative problem solving as issues arise. We have a strong portfolio of architectural projects where a client's budget and timeline are significant considerations.

### PROJECT TEAM

Each member of our team is selected for the expertise they bring to our diverse projects. Because our team has worked together for years, efficiencies in planning, design, and administrative methods have been realized. We pass those advantages along to you.

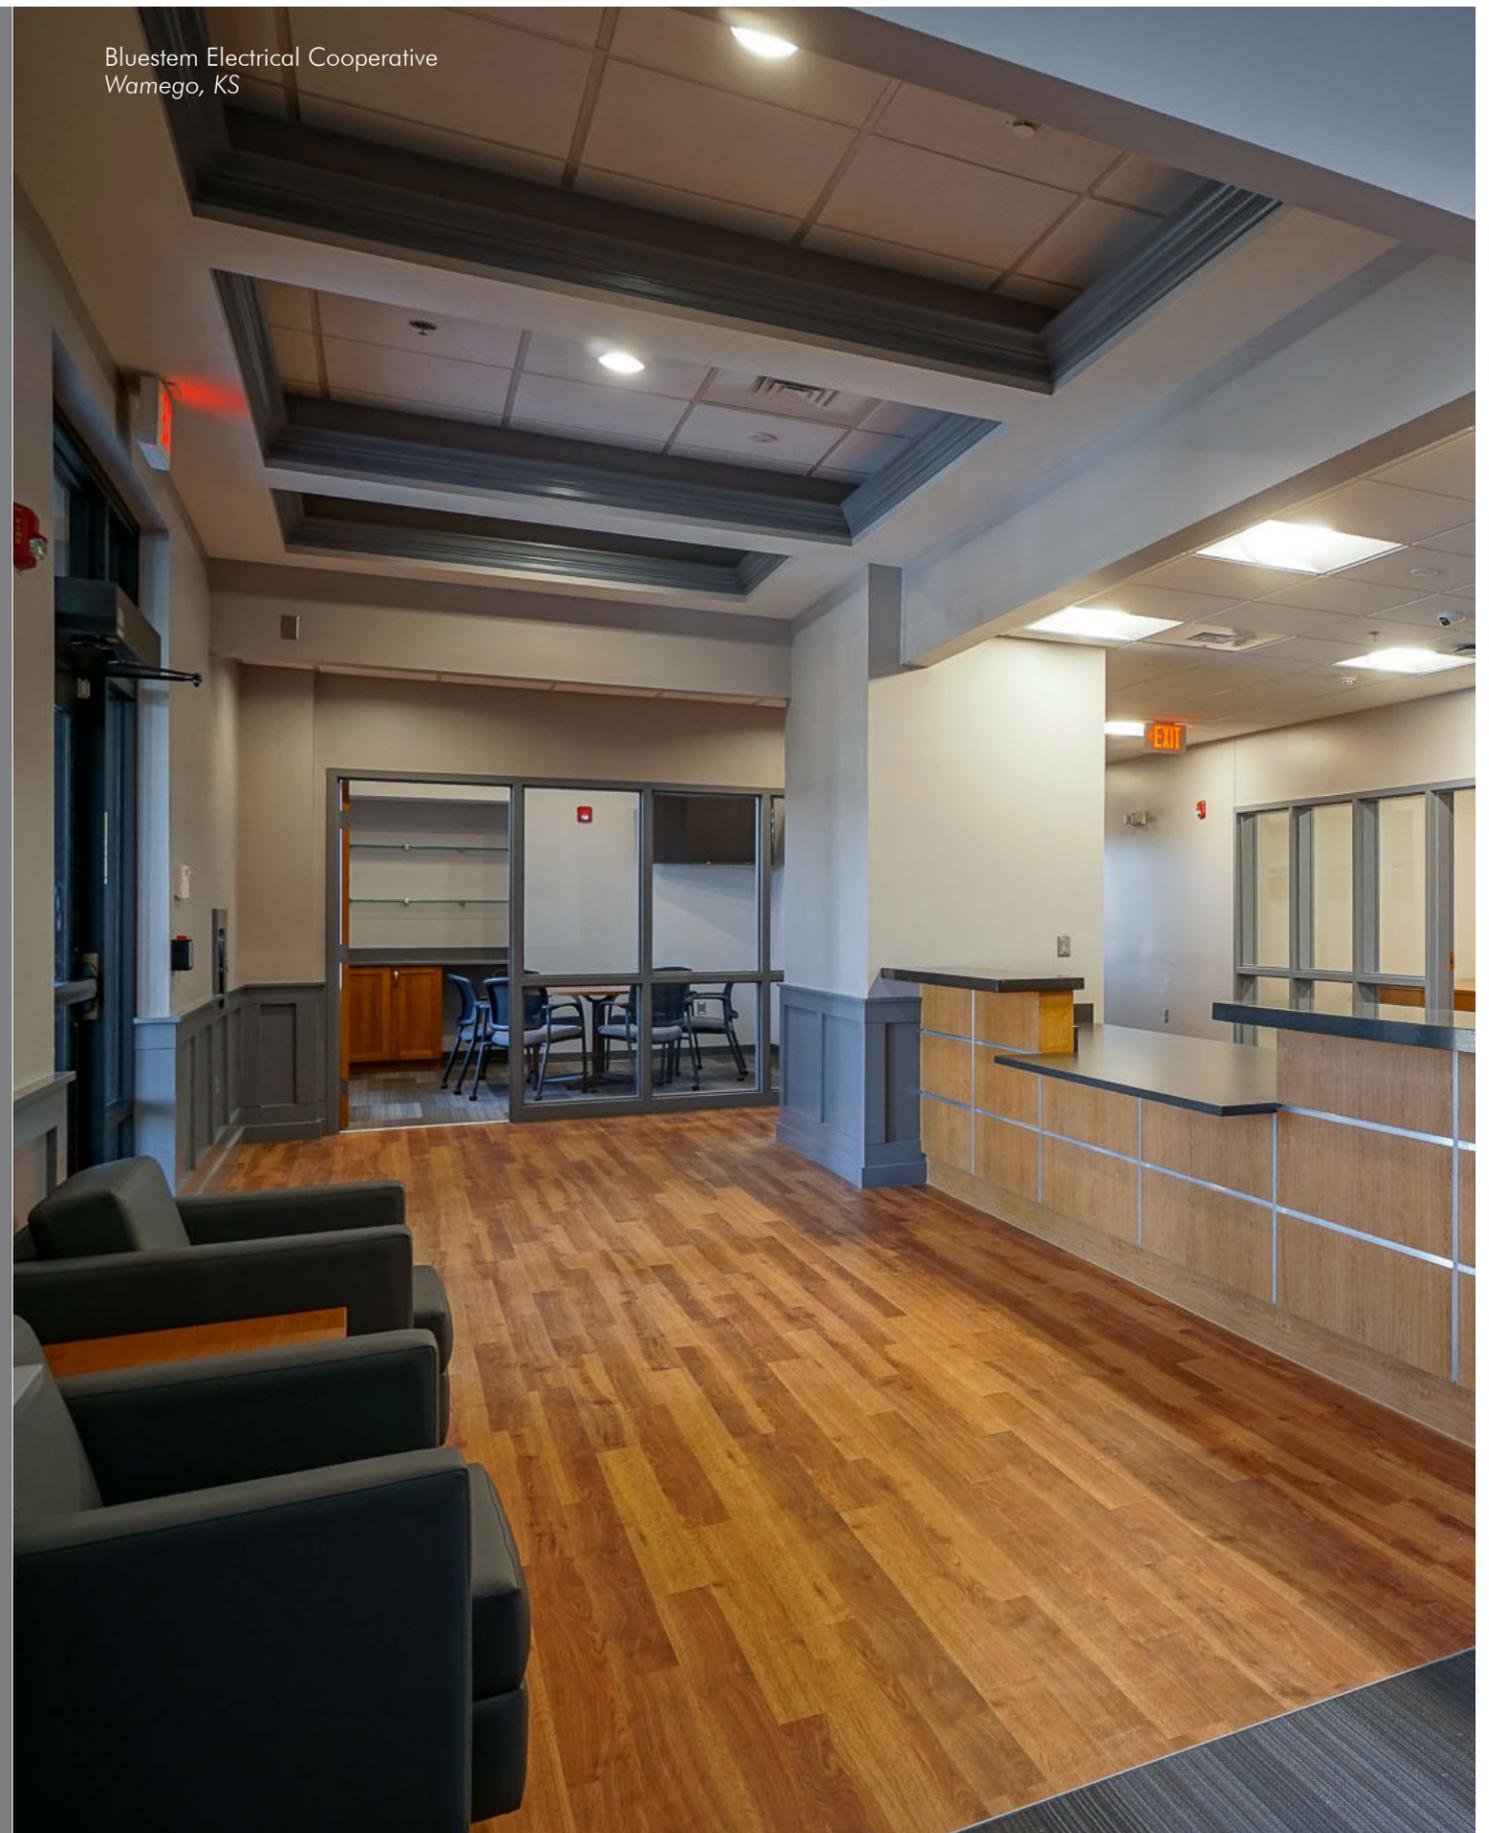

Together, they bring a balance of technical competence and specialized expertise that will allow them to work efficiently with you. Because BG has fostered an environment of mentoring and shared resources across our offices, our collective knowledge is shared and cultivated among every member of our team.

### OUR EXTENDED CAPABILITIES

Projects today are multi-faceted, requiring continual collaboration between different disciplines and the client. As our firm has grown, we've added disciplines to target your specific needs. Selecting a firm that can work together in-house to provide you architecture and engineering solutions is advantageous. By combining these services under one contract to meet your targeted needs, we are able to offer a better coordinated, more efficient process from a project's onset. Under one name, BG groups together different design disciplines to provide resources to meet diverse project needs.

Our firm stands apart from tradition, due to the foresight of BG founders, who, over 44 years ago, started a collaborative firm of forward-thinking professionals known for delivering excellent customer service. Today we have a professional staff of 90 people, including 25 licensed architects and engineers. Our people are experts in their fields, but above all, they're focused on realizing each client's vision.

Bluestem Electrical Cooperative

## CIVIC & CULTURAL ARCHITECTURE

The fabric of a community is embodied through civic and cultural buildings. They preserve our local heritage and communicate our aspirations. They are critical to continued growth. Whether that means designing a new downtown landmark to kickstart revitalization or renovating existing building systems to promote energy efficiency, we can help you achieve your vision.

We start by developing an understanding of your culture and work to bring together the many voices of your community. We design to maximize performance, create a unique sense of place, and enhance the individual experience. No matter the size of your project, we want to leave you with a building that celebrates your community.

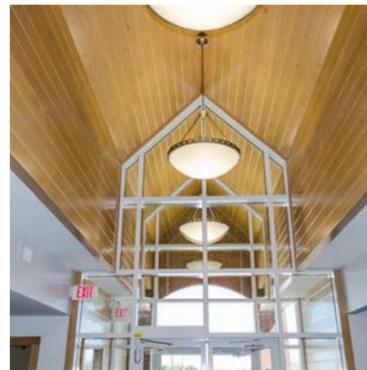

### Pony Express Museum Seneca, KS

This two story red brick building was built in 1880. Preservation work entailed repainting bricks and repairing the cast stone face of the window sills, and restoring the original cast iron columns and lintels plus the front awning. The Main Street Historic District in Seneca is listed on the National Register of Historic Places where the Pony Express Museum is located.

### College Ave. United Methodist Church Manhattan, KS

BG Consultants, Inc. evaluated opportunities and constraints for needed growth. The expansion provides a public front to a facility that has long been without a front door to College Avenue in Manhattan, Kansas. Complimenting the existing building, an administrative suite and commons area was designed between the sanctuary and a new fellowship hall with supporting commercial kitchen, audio booth, and storage areas.

### Eudora Community & Aquatic Center Eudora, KS

BG was commissioned to program and design an aquatic and community center for local residents in the City of Eudora. The community center, totaling 23,900 square feet, contains community meeting rooms, a full kitchen, offices, and an 11,600 square foot gymnasium for basketball and volleyball recreation. The 8,000 square foot municipal pool has a concrete deck and features a lazy river, zero-depth entry, a lap pool and slide.

Anderson Building - Lyon County Fairgrounds  
Emporia, KS

### Civic & Cultural Specialities:

- Community Centers
- Libraries
- Religious Facilities
- Aquatic & Recreational Facilities
- Courthouses
- EMS and Fire Stations
- Law Enforcement Centers
- Museums

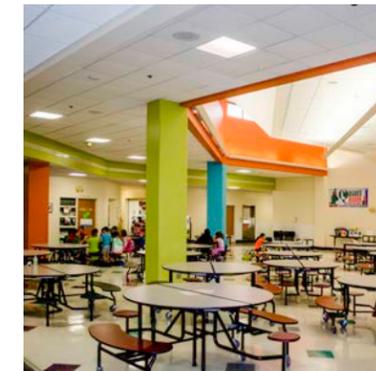

"I can tell the taxpayers of USD 383 with complete honesty and enthusiasm that BG has worked diligently to bring in their projects on time and under budget while meeting the specs. It has been a pleasure to work with your firm... My only regret is that we did not have your firm involved with more of our projects."

- Dave Colburn,  
USD 383 Board of Education Member

## EDUCATIONAL ARCHITECTURE

School facilities built in the 1950s and 60s with narrow corridors, minimal safety features, failing HVAC systems and uninspired aesthetics have proven detrimental to learning. Today, school designs need to include spaces that encourage spontaneous interaction, transparency between individual zones, carefully calculated indoor air quality and lighting, and thoughtful use of colors and materials.

Driven by our passion for bettering educational environments, our architects strive to create flexible spaces that enhance the overall learning experience at every level — from primary and secondary schools to college campuses.

### Quail Run Elementary School Lawrence, KS

The Quail Run Elementary School Addition and Renovation is part of a multiple school package awarded to BG Consultants for the Unified School District 497. The package was initiated to create secure entry points and renovate all bathrooms to meet the District's newly created security and accessibility standards. Quail Run underwent multiple upgrades throughout in order to update the facility to further accommodate the district's Blending Learning environment.

### Ogden Elementary School Ogden, KS

BG Consultants was contracted to design an addition to the school and renovate portions of the existing building. For the project, BG architects aspired to bring the learning environment to the entire facility and add flexibility and purpose to previously underutilized spaces. Through careful planning and coordination, BG developed a design that exceeded client expectations and bid significantly under budget.

### KSU College of Engineering Student Success Center Manhattan, KS

BG Architecture was hired to design renovations that made the library more conducive to group interaction and modern-day technology, while also updating interior finishes. A new ceiling was put into help the acoustics of the space. New, modern light fixtures were added to create a pleasant environment for studying and working.

## COMMERCIAL ARCHITECTURE

The architecture housing your business serves as a reflection of your identity and culture. Well-designed office and mixed-use environments have been shown to create a greater quality of work life for employees and enhance patron experience. Poorly designed spaces, on the other hand, lower retention rates. By prioritizing inhabitants and performance in facility design, BG Consultants can help you maximize returns on your investment.

With expertise in local market trends and innovative placemaking strategies, our architects will partner with you to design highly flexible, environmentally conscious, and productive commercial buildings. We want your company's purpose to resonate through every detail inside and out.

### Bluestem Electrical Cooperative Wamego, KS

Bluestem Electric Cooperative's new Wamego building features a 13,100 sq ft office building with a large mezzanine space for storage and a 21,275 sq ft truck maintenance facility. The office side of the facility features a brick facade with a split CMU water table and columns. The building signage also features a herringbone brick inlay to feature the business signage monumentally.

### Briggs Auto Group Lawrence, KS

Briggs Automotive complex consists of three dealerships and an auto body shop. A master plan of the Briggs complex examined all of the Briggs facilities and re-imagined the various building sites as a single automotive complex. The Nissan Dealership presents the first face of the Briggs complex from the main street. Site improvements around the building create a grand entry way with car display space near the building façade.

### Platinum and Company Manhattan, KS

The Platinum and Company Hair Salon is a 2400 sqft high end salon located in the updated downtown district of Blue Earth Plaza. The project involved an interior build-out of an unbuilt tenant space to include private consultation areas, eight dedicated hair washing stations, and 22 stylists stations. The space features a mix of industrial and modern aesthetic with clean white and black finishes punctuated with color through art and product features.

Westport Commons  
Manhattan, KS

"We design for people. I approach every project knowing there's a story behind each client. It helps me create meaningful spaces that connect to their community and place. I get excited to be a part of writing that story"

- Clint Hibbs, Lead Architect

Manhattan Oral Surgery and Implant Center  
Manhattan, KS

“Over the years, I’ve worked with BG Consultants on a number of projects. I always enjoy working with them because I know their team of architects and engineers will listen to understand our needs and use their expertise to design projects that benefit our community. They work hard to earn your trust on every encounter, on every project. I highly recommend BG Consultants to anyone.”

- Brett Ballou,  
Schultz Construction

## HEALTH & WELLNESS

As experienced health and wellness designers, our professionals understand how to create therapeutic, safe environments that resonate with patients and staff. Our exterior designs cleanly balance the professional image of cutting-edge healthcare with the facility’s surrounding context, while our interiors utilize health-conscious and durable materials to fashion comforting, relaxed environments for your patients. We also incorporate appropriate sound, transparency, temperature, and lighting techniques for individual settings.

Working with your practitioners, staff, and technical experts, we will develop spaces that enrich the patient experience, assimilate specialized technology, and optimize the efficiency of your practice.

**Womens Health Group East**  
Manhattan, KS

The Women’s Health Group P.A. approached BG Consultants for a design build of a newly constructed East Clinic to better serve the ever growing needs of their clientele. The new building is a 6,297sq.ft. clinic which includes a new lab, eight exam rooms, three specialty exam rooms and associated support spaces. With an emphasis on design, this new building will allow clients feel they are in a high end but comfortable environment.

**Manhattan Oral Surgery and Implant Center**  
Manhattan, KS

While adhering to a strict budget, the modern architectural forms of this project convey clarity and strength, reflecting the precision of this oral surgery practice. A focus on patient care is emphasized by attention to quality of space and warm interior tones. Contrasts of vernacular forms with modernized treatment of exterior and interior finishes creates a professional atmosphere in this facility.

**Tindall Orthodontics**  
Manhattan, KS

The Tindall Orthodontics Facility is housed in one of the buildings in professional business development complex Westport Commons, and was developed in two phases. Phase One involved working closely with the Client to develop the building core and shell as part of a master planning effort, while Phase Two concentrated on the interior build-out. The overall design goal of the practice was to create a positive and friendly environment for patients and staff.

## PARKS & RECREATION/SPORTS FACILITIES

Working with Recreation and Sports professionals and their unique facilities, as well as the opportunity to maintain and enhance the critical amenities of our built environment, are opportunities our team is passionate about. Members of our team have significant experience master planning and building parks and recreation facilities, both large and small scales, locally and nationwide. Providing solutions that meet the specific needs of public recreation and sport facilities is not a common combination of skills in our profession, but one that our team have successfully completed over the course of a number of years.

### KSU Baseball and Soccer Manhattan, KS

After assisting K-State with concept imagery and fund-raising, BG designed a new Soccer Stadium and renovations to the existing Tointon Family Baseball Stadium (TFBS). The new Soccer Stadium seats 1,400 in general admission, provide Press, TV and Radio booths and a premium club. TFBS improvements included field and internal updates as well as a new face-lift from the exterior and addition of an expanded team clubhouse.

### Wall Park Sports Complex McPherson, KS

This project began as a project to add a new concession and toilet facility between existing ball fields and look at ways to improve drainage, but developed into an overhaul of all the spaces in between. We developed a solution that improved the poor drainage from the fields, bleachers and walkways, creating new accessible walkways throughout, while coordinating with the new Concession structure and remaining within budget.

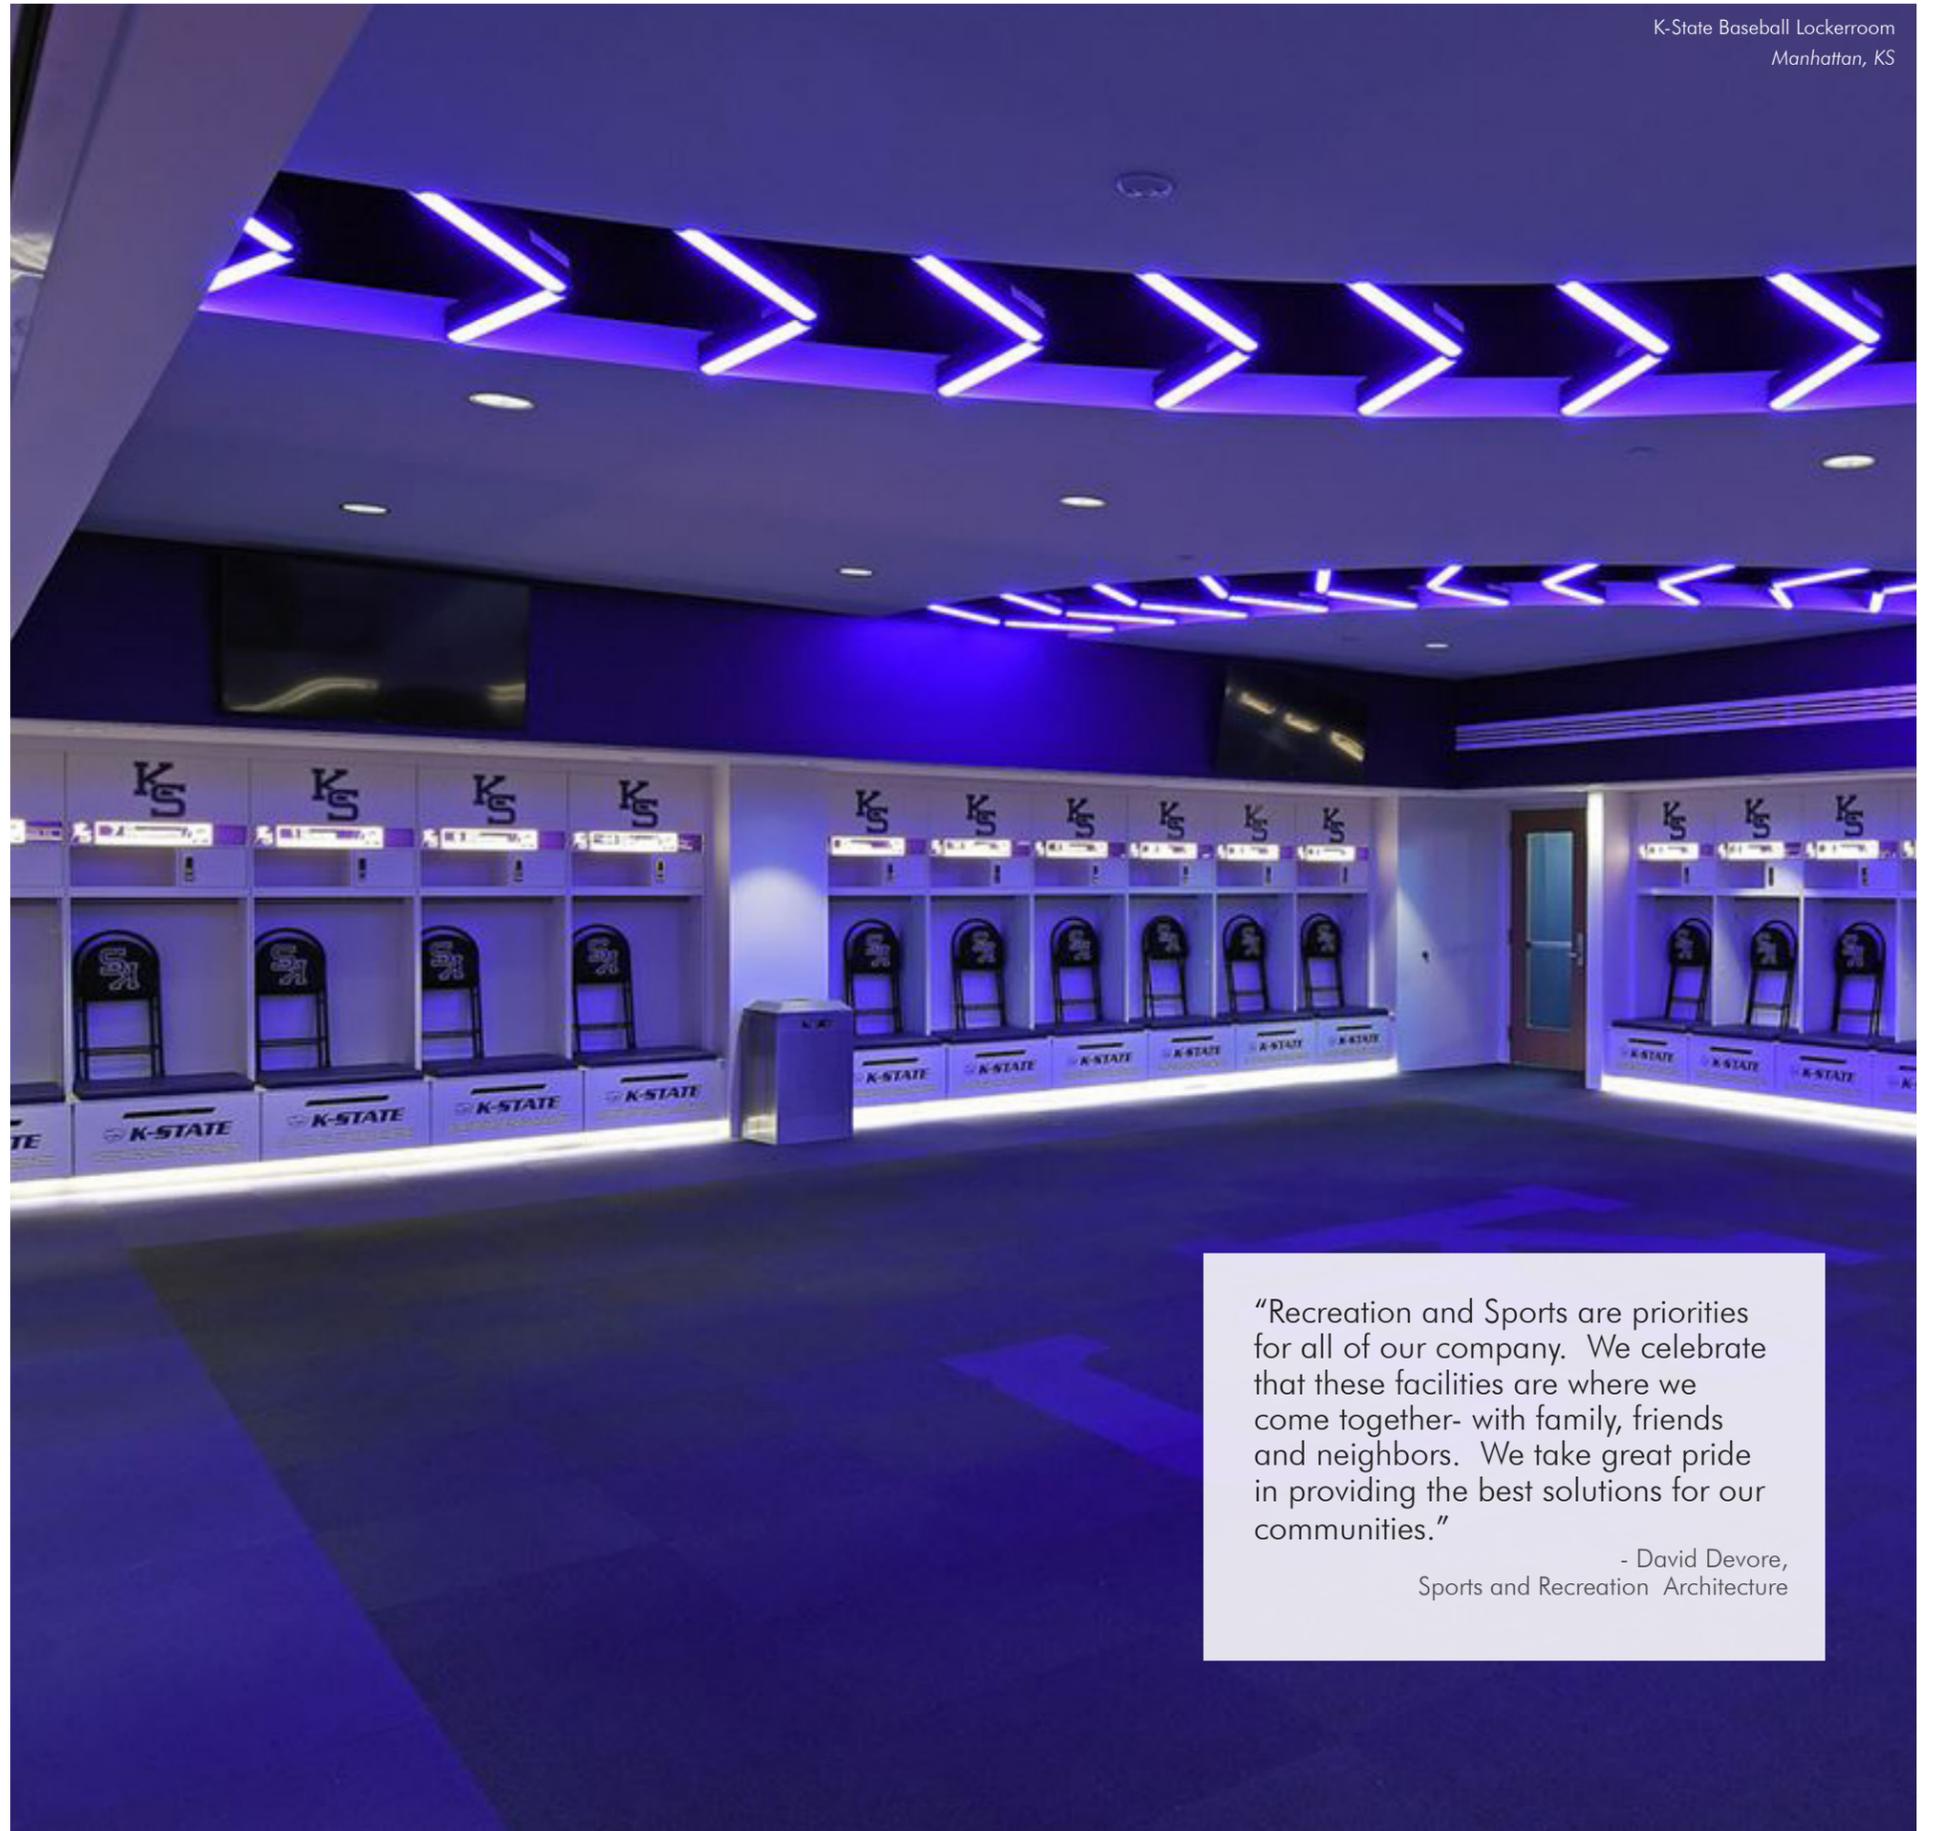

### Lotatorium Baldwin City, KS

Baldwin City, Kansas selected BG Consultants to provide master planning and design services for the completion of their unique "Lotatorium" vision. The Lotatorium- a combination of Auditorium and the existing vacant Lot- was conceived as an outdoor community meeting space and a central square within the downtown that would spur additional use throughout the year. The final design has incorporated all of the top needs identified by the users, while creating a cohesive whole to the space.

K-State Baseball Lockerroom  
Manhattan, KS

"Recreation and Sports are priorities for all of our company. We celebrate that these facilities are where we come together- with family, friends and neighbors. We take great pride in providing the best solutions for our communities."

- David Devore,  
Sports and Recreation Architecture
